

Refior

As of September 16, 1992, the Mountain Mutual Water Company's Regulations have been amended to read:

Tap and curb valves will be supplied if there is electric power to cistern and all other water regulations are met prior to October 1, 1992.

Water service will not be supplied until the roughed in pumping and electrical have been approved by County Inspector.

The Water Company will be the only one to control curb valve. If a second or third party turns water on at curb valve and water is used on premises, a \$500.00 fee will be charged to the property owner.

Lee E. Brown

Lee E. Brown, Manager M.M.W.C.

I have read the above and understand the amendment.
